# Highlights

### High colour rendering (CRI>80)

The colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural outdoor light has a CRI of 100 and is used as the standard of comparison for any other light source. The CRI of Philips LED light bulbs is always higher than 80, close to the sun's value, reflecting colours truly and naturally.

### Instant light
Instant full round light to enhance the atmosphere

### Cool white light (4000K)

Light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, cosier light, while those with a higher Kelvin value produce a cool, more energising light.

### Last up to 30 years
With a lifetime of up to 30,000 hours, this Philips LED bulb will ensure your desired atmosphere for up to 30 years.*
